This technology is backed by scientific attitude, mentality, and capacity. OPTAGLIO originated from Czech Academy of Science and research has always been among its top priorities, covering a range of projects from product innovation to a deeper understanding of the underlying material and physical issues. These research activities were consolidated into OPTAGLIO LABS, situated in Lochovice, Czech Republic.

**About OPTAGLIO**

Optaglio is a research organisation and the global leader in high resolution e-beam lithography security holograms. During almost 25 years of our history, we have delivered hundreds of millions of holograms to governments, financial institutions and other organizations in more than 50 countries around the world. Our unique technology has been broadly recognized as the industry standard for optical security.

In 2015, a large scientific centre and production facilities were opened in Lochovice, Czech Republic.

Online

standards, operates under strict 24/7 security supervision. Our processes, data and facilities. The company is a member through which it registers all its security devices and idon.
